− ALPHA WILDLIFE SUMMITS −

Human–Carnivore Conflict & Coexistence

27 November 2026

The Human–Carnivore Conflict & Coexistence Summit organized by Alpha Wildlife Summits will be held on November 27, 2026. We will use a Professional Zoom Video Conference package. If you are a presenter or a registered attendee, you will be sent an email with a Zoom Link that will be used the day of the conference, with the day/time corresponding to the MST date. All participants will be required to click on the invitation link and join the meeting. During the whole conference, Hosts and the Scheduled Panelist will have microphone access; microphone access will not be enabled for participants unless the question sent in requires further explanation, in which case microphone access will be granted. Participants and attendees will be encouraged to use the Q&A section of the Zoom Webinar during the scheduled question period with an inquiry. Because of time constrictions, we will not be able to accommodate all questions – the Host will select the questions with the most relevance to the topic and read them; the presenter will then provide an answer.

Schedule – 27 November 2026

Human–Carnivore Conflict & Coexistence

Period	Presenter	Duration of presentation (min)	Duration of question period (min)	Title of presentation
08:30 – 08:35	*Jessica Malyk*	10	-	Procedural notes
08:35 – 08:45	*Gilbert Proulx*	10	-	Opening remarks
08:45 – 08:50	*Introduction of upcoming speaker*			
08:50 – 09:30	**Gilbert Proulx**	30	10	Human-Carnivore Conflict & Coexistence, The North American Wildlife Conservation Model, and A Look to The Future
09:30 – 09:35	*Introduction of upcoming speaker*			
09:35 to 10:15	**Firas Hayder** *et al.*	30	10	Public Perception and Human–Genet Interactions in the Arab World: Insights from Social Media
10:15 – 10:20	*Introduction of upcoming speaker*			
10:20 – 11:00	**Allison Fisher** *et al.*	30	10	A Comparison of DNA Metabarcoding Primers for Dietary Analysis of Wild Carnivores in Eastern Rwanda with Implications for Monitoring Human–Wildlife Conflict
11:00 – 11:05	*Introduction of upcoming speaker*			
11:05 – 11:45	**Eduardo De Lucca,** and Naomi X. Louchouarn	30	10	Perceptions and experience impact ranchers' tolerance towards pumas (*Puma concolor*) in the Argentine Pampas region.
11:45 – 12:25	*LUNCH*			
12:25 to 12:30	*Jessica Mayk*	5	-	Procedural notes
12:30 – 13:10	**Jon Beckmann**	30	10	Using Circuit Theory to Determine Source–sink Landscape Characteristics for North American Black Bears in The Northern US Rockies
13:10 to 13:15	*Introduction of upcoming speaker*			
13:15 to 13:55	**Sadie Parr** and Gilbert Proulx	30	10	Can grey wolf (*Canis lupus*) populations of Jasper and Banff National Parks, Alberta, Canada, persist with adjacent fur traplines?
13:55 – 14:00	*Introduction of upcoming speaker*			
14:00 to 14:55	**Gilbert Proulx** and Pauline Feldstein	45	10	A White-nosed Coati (*Nasua narica*) Population Outbreak Caused by Supplemental Feeding in a Mexican Eco-resort without Apex Predators & Too Close for Comfort – Minimum Distance between Mexican Resort Tourists and Coatis to Avoid Conflicts
14:55– 15:00	*Introduction of upcoming speaker*			
15:00 to 15:40	**Kim Villeneuve** and Gilbert Proulx	30	10	Carnivore Killing Contests Are Anything but Wildlife Management

Period	Presenter	Duration of presentation (min)	Duration of question period (min)	Title of presentation
15:40 – 15:45	*Introduction of upcoming speaker*			
15:45 – 16:35	**Gilbert Proulx** *et al.*	40	10	Misleading Science-based Claims Impact Significantly on Carnivores
16:35 – 16:40	*Introduction of upcoming speaker*			
16:40 – 17:35	**Adrian Treves** *et al.*	45	10	Coexistence Revisited
17:35 – 17:45	*Gilbert Proulx*	10	-	Final remarks
